Job Summary

Customer called in reporting that their undermount kitchen sink had fallen from the countertop due to a failed and improperly installed seal. The sink dropped with the garbage disposal still attached, which broke the drain piping and water supply lines beneath the sink. The kitchen drain line was also clogged, and once the piping separated, backed-up water discharged into the kitchen, causing flooding in the area.

Upon arrival, I was shown the kitchen and the detached sink assembly. After inspecting the cabinet space and removing items stored underneath, I verified the kitchen drain line was clogged and the broken drainage piping was actively leaking. There were multiple water supply lines that were also bent from the garbage disposal falling on them that were also leaking. Water was shut off at the shut off valves. New supply lines for RO system, kitchen faucet, refrigerator, and dish washer will be needed. I explained findings to the customer and reviewed options to clear the drain, including snaking or hydro jetting. I recommended hydro jetting as the more reliable method for fully cleaning the line, and the customer approved.

I set up equipment and hydro jetted the kitchen sink drain line multiple passes, clearing a blockage consisting of eggshells and food debris. After completion, I tested and confirmed the drain was flowing properly. I then capped the drain line to prevent further leakage since the sink assembly is currently detached.

Customer is working with their insurance company to determine repair scope, which may include cabinet removal. I provided my contact information for follow-up questions and prepared an estimate to reinstall the sink, rebuild the drainage, repair the water supply lines, and reinstall a disposal. I recommended downsizing from the existing 1 HP garbage disposal to a 1/2 HP unit to reduce weight on an undermount installation.

All findings and work performed were documented with before, during, and after photos/videos, which will be emailed to the customer along with the hydro jetting receipt. Work area was cleaned thoroughly and all tools and equipment were removed before leaving the jobsite.

Estimate – Kitchen Sink Drain Line Hydro Jetting

Customer is experiencing a clogged kitchen sink drain line that is backing up and flooding into the kitchen area. We will perform a drain cleaning service using a mini hydro jetter to properly clear the blockage.

Scope of Work:

- Set up and run mini hydro jetter through the kitchen sink drain line
- Perform multiple passes to thoroughly remove grease, food debris, and buildup
- Test drainage to verify proper flow once cleaning is complete
- Cap off the kitchen sink drain line after service to prevent leakage until permanent repairs are performed

This service is intended to restore drainage and stop active backups. Additional repairs to the sink, piping, or fixtures are not included in this estimate and can be completed under a separate estimate if approved.

All work area will be cleaned prior to departure.

TASK	DESCRIPTION	QTY	PRICE	TOTAL
P4107	Mini-Jet Branch Line Cleaning	1.00	\$698.85	\$698.85
	What's Included:			
	• High-pressure water jetting of an existing branch drain line to remove grease, scale, or soft blockages
